

Practice questions – Year 3 – Equivalent fractions

1. Find an equivalent fraction for $\frac{1}{2}$ (equivalent fractions)
2. Find an equivalent fraction for $\frac{3}{4}$ (equivalent fractions)
3. Find an equivalent fraction for $\frac{2}{5}$ (equivalent fractions)
4. Find an equivalent fraction for $\frac{5}{8}$ (equivalent fractions)
5. Find an equivalent fraction for $\frac{7}{10}$ (equivalent fractions)
6. Find an equivalent fraction for $\frac{2}{3}$ (equivalent fractions)

Practice question answers – Year 3 – Equivalent fractions

1. Find an equivalent fraction for $\frac{1}{2} = \frac{2}{4}, \frac{5}{10}, \frac{10}{20}$ etc. (equivalent fractions)
2. Find an equivalent fraction for $\frac{3}{4} = \frac{6}{8}, \frac{15}{20}, \frac{30}{40}$ etc. (equivalent fractions)
3. Find an equivalent fraction for $\frac{2}{5} = \frac{4}{10}, \frac{10}{25}, \frac{20}{50}$ etc. (equivalent fractions)
4. Find an equivalent fraction for $\frac{5}{8} = \frac{10}{16}, \frac{25}{40}, \frac{50}{80}$ etc. (equivalent fractions)
5. Find an equivalent fraction for $\frac{7}{10} = \frac{14}{20}, \frac{35}{50}, \frac{70}{100}$ etc. (equivalent fractions)
6. Find an equivalent fraction for $\frac{2}{3} = \frac{4}{6}, \frac{10}{15}, \frac{20}{30}$ etc. (equivalent fractions)
