

Practice questions – Year 4 – Partition decimals

1. $236.4 = 200 + \underline{\quad} + \underline{\quad} + \underline{\quad}$ (partition decimals)

2. $719.3 = \underline{\quad} + \underline{\quad} + \underline{\quad} + 0.3$ (partition decimals)

3. $629.8 = \underline{\quad} + 20 + \underline{\quad} + \underline{\quad}$ (partition decimals)

4. $451.7 = \underline{\quad} + \underline{\quad} + 1 + \underline{\quad}$ (partition decimals)

5. $384.9 = \underline{\quad} + 80 + \underline{\quad} + \underline{\quad}$ (partition decimals)

6. $572.6 = \underline{\quad} + \underline{\quad} + 2 + \underline{\quad}$ (partition decimals)

7. $648.3 = \underline{\quad} + \underline{\quad} + \underline{\quad} + 0.3$ (partition decimals)

8. $315.4 = \underline{\quad} + \underline{\quad} + 5 + \underline{\quad}$ (partition decimals)

Practice question answers – Year 4 – Partition decimals

1. $236.4 = 200 + 30 + 6 + 0.4$ (partition decimals)

2. $719.3 = 700 + 10 + 9 + 0.3$ (partition decimals)

3. $629.8 = 600 + 20 + 9 + 0.8$ (partition decimals)

4. $451.7 = 400 + 50 + 1 + 0.7$ (partition decimals)

5. $384.9 = 300 + 80 + 4 + 0.9$ (partition decimals)

6. $572.6 = 500 + 70 + 2 + 0.6$ (partition decimals)

7. $648.3 = 600 + 40 + 8 + 0.3$ (partition decimals)

8. $315.4 = 300 + 10 + 5 + 0.4$ (partition decimals)
