

Practice questions – Year 4 – Partitioning

1. $1,236 = 1,000 + 200 + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$ (partitioning)

2. $2,468 = \underline{\hspace{1cm}} + 400 + \underline{\hspace{1cm}} + 8$ (partitioning)

3. $5,741 = 5,000 + \underline{\hspace{1cm}} + 40 + \underline{\hspace{1cm}}$ (partitioning)

4. $3,610 = \underline{\hspace{1cm}} + 600 + \underline{\hspace{1cm}}$ (partitioning)

5. $\underline{\hspace{1cm}} = 3,000 + 500 + 60 + 1$ (partitioning)

6. $\underline{\hspace{1cm}} = 2,000 + 100 + 40 + 7$ (partitioning)

7. $\underline{\hspace{1cm}} = 4,000 + 700 + 20 + 5$ (partitioning)

8. $\underline{\hspace{1cm}} = 2,000 + 600 + 10 + 8$ (partitioning)

Practice question answers – Year 4 – Partitioning

1. $1,236 = 1,000 + 200 + 30 + 6$ (partitioning)

2. $2,468 = 2,000 + 400 + 60 + 8$ (partitioning)

3. $5,741 = 5,000 + 700 + 40 + 1$ (partitioning)

4. $3,610 = 3,000 + 600 + 10$ (partitioning)

5. $3,561 = 3,000 + 500 + 60 + 1$ (partitioning)

6. $2,147 = 2,000 + 100 + 40 + 7$ (partitioning)

7. $4,725 = 4,000 + 700 + 20 + 5$ (partitioning)

8. $2,618 = 2,000 + 600 + 10 + 8$ (partitioning)
